Natural Ingredients

The Clear Choice for Superior Formulations

Capra Biosciences' salicylic acid is a **100% natural**, highly effective, and sustainable form of salicylic acid that enables formulations with powerful exfoliation and skin-clarifying properties.

With our exceptional purity and performance, formulators can create **highly effective personal care products, often at lower usage levels.**

Applications

- Blemish-prone skin formulations
- Daily exfoliating skincare (cleansers, toners, serums)
- Scalp and dandruff solutions
- Foot and targeted exfoliation treatments

Properties

- > 98% purity
- Third-party verified as phenol-free (< 0.2 ppm)
- Superior solubility
- Creates crystal-clear gels for premium aesthetics
- Suitable for gels, serums, emulsions, liquids, and sprays

Sustainability

We use microorganisms as natural agents to create active ingredients via biosynthesis.

- Bio-based carbon percentage: 100%
- Produced via precision fermentation
- Made in the USA
- Supports environmentally responsible formulation strategies

Formulation Guidelines

- Use in water phase, or cooldown phase under 40°C
- Readily soluble @ 0.2% in:
 - Propylene glycol
 - 1,2 Hexanediol
 - Propanediol
 - Butylene glycol
- Adjust formulation to pH of 3-5 for best efficacy

Proven Performance

Highly rated by consumers who tested gel cleansers and lip treatments made with Capra Biosciences' salicylic acid:

89.7%
Gentle

89.7%
Moisturizing/
hydrating

89.7%
Non-sticky

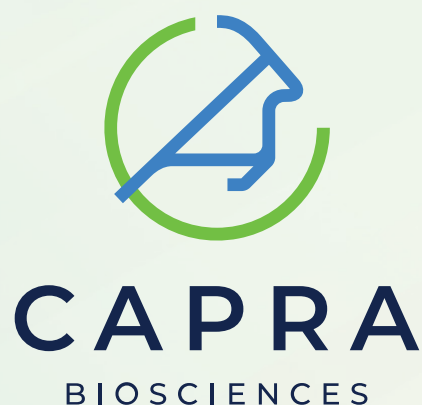

86.2%
Smell/flavor

82.8%
Clean

About Capra Biosciences

Capra Biosciences is a venture-backed company focused on the sustainable production of petrochemical replacements using a proprietary bioreactor platform. In our Sterling, Virginia, facility, we produce two drop-in personal care actives – salicylic acid and retinol. With a pipeline spanning active pharmaceutical ingredients (APIs), industrial chemicals, and more, we are the cost-effective, resilient biomanufacturer of the future.
